

Half-Ton Snowplow

Half-Ton Snowplow

Half-Ton Snowplow

Until now, snowplowers with half-ton pickup trucks have had to compromise when choosing a snowplow — their vehicles won't handle a full-size commercial plow, but the lightweight plow offerings didn't meet their plowing needs.

With the new WESTERN HTS™ snowplow, you no longer need to sacrifice. It's a full-size, full-featured snowplow designed exclusively for today's lighter half-ton, four-wheel-drive trucks.

It handles standard-duty commercial, institutional and extended-use homeowner applications, providing rugged, pro-like performance without the extra weight.

The two-spring trip blade protects your plow and truck when the plow strikes an obstruction. Elastomer trip pads further reduce excessive jarring and soften the blade return when tripping occurs.

Six vertical ribs and the exclusive WESTERN POWER BAR provide unmatched structural reinforcement.

OPTIONAL ACCESSORIES

- Snow Deflector
- Steel Shoes
- Curb Guards
- 3/8" Cutting Edge
- 1/2" Cutting Edge
- Back Drag Edge

NIGHTHAWK™ halogen headlamps feature state-of-the-art reflector optics that illuminate the entire plowing area with a smooth, wide beam pattern.

Vented light bar permits additional air flow to the radiator.

Covered hydraulic system is protected from the elements.

Exclusive WESTERN POWER BAR delivers superior torsional strength, supporting the area of the plow where it's needed most.

Control options include a hand-held or joystick control; each provides precise blade control.

ULTRAFINISH™

ULTRAFINISH™ baked-on powder coat – the industry's best protection against wear and rust.

One-side hookup. The simplified UltraMount® mounting system is fast and easy. Simply drive into position, letting the flared receiver brackets guide the plow into place, rotate the handle to connect the plow, plug in the electrical connectors, and you're ready to go. The HTS snowplow uses existing UltraMount vehicle mounts.

Hydraulic Scrape Lock – hydraulically locks the blade down for enhanced scraping and clean back-dragging performance

14-gauge Steel Moldboard

75-degree Attack Angle – most aggressive of any plow in its class

15½-inch Curl Radius – enhanced snow rolling action for maximum plowing efficiency

See our separate full-line snowplow and spreader catalogs for the complete WESTERN snow and ice control lineup.
