THE RIGHT SPRING FOR YOUR APPLICATION

AEROFORCE S2S

Modular design for installation flexibility

Designed to deliver the ultimate versatility, durability, and performance, the AeroForce S2S is the industry's leading electric side-to-side tarp system for trailers. In addition to our revolutionary compression spring technology, the AeroForce S2S features our ForceLink rear arm assembly—allowing for maximum tailgate opening and flexibility during operation.

Chain allows for maximum tailgate opening

Low profile minimizes damage risk

Modular arm design

PROVEN MOTOR AND GEAR BOX TECHNOLOGY provides consistent power and performance

REVOLUTIONARY SPRING TECHNOLOGY

AEROFORCE F2B

Almost twice the downforce of the competition

The AeroForce F2B tarp system features our revolutionary compression spring technology and outmuscles the competition by providing nearly twice the downforce. Additional downforce reduces arm bounce and system wear and tear, all while keeping your load safe and secure.

Internal spring protected for maximum longevity

Multiple pivot sizes for 13' to 53' applications

MINIMIZES SPRING FATIGUE AND TENSION LOSS OVER TIME

HEAVY-DUTY ARMS IDEAL FOR RUGGED APPLICATIONS

EASY COVER

Powerful springs and durable arms

The Aero Easy Cover tarp system is the most cost-effective and easy to use front-to-back system for dump applications. Featuring the industry's most powerful springs and strong, durable arms, the Easy Cover system is designed for easy installation, maintenance, and durability. With five spring options available, you can trust that we have the right spring for your application.

TOPGLIDE

Engineered for maximum reliability

Designed for easy installation, maintenance, and smooth consistent operation, the Aero TopGlide is a cable-driven system that provides great load protection and unobstructed loading access. While cable driven systems are not 100% waterproof, both Pro and Pro+ tarps are positioned over the top rail, offering the industry's best tarp seal.

INDUSTRY'S ONLY HASSLE-FREE, LOW MAINTENANCE OPERATION

EASY REPLACEMENT WITH MODULAR COMPONENTS SAVING YOU TIME + MONEY

UNDERMOUNT
DUMP BODIES AND TRAILERS UP TO 42'

Industry's strongest, most reliable, and longest lasting spring assembly

10-SPRING FLANGE
LONG DUMP TRAILERS 45' TO 53'

Dual shaft and arm design for longer applications

TWIN 280°
IDEAL FOR DUMP BODIES

*High-mount unobstructed view is a game changer for asphalt haulers
Eliminates arm bounce*

POWERPACK
DUMP BODIES AND TRAILERS UP TO 28'

*Fully enclosed, low-profile design protects spring from elements
Universal sidemount*

5-SPRING FLANGE
DUMP TRAILERS UP TO 38'

Alternative to undermount spring when space is limited

ROLL TARPS

Haul with confidence

Providing the maximum weather-sealed protection for dump bodies and trailers, Aero offers a variety of electric and manual roll tarp systems. Our Classic Roll tarp is closed using a series of web straps and ratchets. The Kwik-Lock system locks in place without straps, cables, or tie downs while our electric PowerLock system is quickly opened and closed with a motor—no straps, cables, or tie downs required.

HEAVIEST SOLID TARP IN THE INDUSTRY
BOW MODELS AND SYSTEMS AVAILABLE FOR ANY APPLICATION

SIDEKICK 2

Tube and roller technology—the proven tarp solution for side dump trailers

The proven best solution for side dump trailers. The patented tube and roller design works in unison with the industry's most reliable spring and motor technology to cover and uncover side dump loads quickly and consistently. Featuring the strongest roll tube on the market, the SideKick 2 side-to-side tarp system outperforms the competition.

RELIABLE AND DURABLE TUBE AND ROLLER TECHNOLOGY

TIGHTER SEAL AGAINST THE TOP-SIDE-RAIL

INNOVATIVE PRODUCTS
**ENGINEERED
 FOR SUCCESS**

Aero is recognized as a transportation industry innovator. With a vast skilled knowledge base, our team thrives on constantly working to improve our products and creating new ones—all with the goal to serve our customers. Many of our innovative solutions have grown out of recognizing industry needs and demands. Our products are developed with long-term value in mind.

EASY PULL AND ROLL-N-PULL

Easy installation and operation

Our front-to-back manual tarp systems for dump trucks and landscape bodies are economical alternatives to a manual throw tarp.

Easy Pull is self-returning. Cover the load by simply pulling the tarp to the rear and securing it over the tailgate. To uncover, Easy Pull safely and quickly recoils the tarp to the front when not in use. Roll-N-Pull is a one-size-fits-all tarp system with a manual crank. The tarp can be pinned in open or closed positions.

▲ **EASY PULL**

Pre-assembled tarp housing with self-returning tarp

ROLL-N-PULL

Manual tarp can be pinned in open and closed positions

PRODUCT	APPLICATION	SYSTEM	MECHANISM	OPERATION	COVER TYPE	HEAPED LOADS

Rolling
Tarp Solution

PRODUCT INNOVATION

SINCE 1944

AERO INDUSTRIES

Groundbreaking engineering that sets the bar

One of the nation's leading providers of innovative accessories for the transportation industry, Aero manufactures a complete line of American-made products for dumps, flatbeds, agriculture, refuse and other trailer applications. Our Indianapolis, Indiana headquarters is a state-of-the-art manufacturing facility with over 140,000 square feet of space.

Aero's history as a leader in the industry includes the introduction of the first aluminum stake Side Kit, the first open top and dump side-to-side roll tarps, and the first rolling tarp system, the Conestoga, in 1984.

Over 30 years of continued research and development has ensured that the Conestoga remains the best rolling tarp system on the market today.

MODELS AVAILABLE FOR:

Flatbeds

Drop Decks

Straight Trucks

AERO[®] CONESTOGA

30" SOLID SHEET REAR BOW

rear bow has full exterior sheet for additional strength, ease of rolling and final tarp installation adjustments

30" FRONT BOW

for stability and ease-of-rolling

**SAFE.

RUBBER SEAL
seals under the stake pockets
for access and protection

WHEEL AND TRACK SYSTEM

1

TRACK DESIGN INCREASES SYSTEM LONGEVITY

The Conestoga was designed to house the wheels within the track system, providing increased wheel protection from the trailer load and outdoor elements.

The stainless steel track and steel V-groove shaped wheels allow the operator to fully open and close the system with ease.

Wheels are not exposed to the elements

Steel on Steel = Ease of rolling and less maintenance

BOW J-CLAMP
keeps tarp secure and
system sealed

BUMP RAIL
protects the track and
seals the tarp

INDUSTRY'S UNDISPUTED BEST WHEEL AND TRACK SYSTEM

The track and wheel design utilizes a unique 'V' groove, eliminating the need for numerous, secondary guide wheels. This design also eliminates wheel 'flat spots' commonly seen in competitor models.

A built-in bump rail reduces impact damage and further maximizes overall system longevity.

28

VS COMPETITOR'S

74

WHEELS ON 48' SYSTEM

Steel on steel wheel and track design

V-groove wheels will not flatten

Lifetime warranty on all wheels and bearings

INTERNAL WHEEL TRACK SYSTEM

wheels are positioned below the loading deck surface

V-GROOVE WHEELS

heavy duty and long lasting with no need for secondary guide wheels

STAINLESS STEEL V-GROOVE TRACK INSERT

provides ease of rolling and long life resulting in reduced downtime and maintenance costs

RUBBER SEAL

allows for use of stake pockets while providing a weathertight seal

BUILT-IN BUMP RAIL

protects the track from side loading and works with the j-clamp to create a watertight seal

2

TWO GREAT REAR LOCKS

TENSION LOCK | *Screw drive operation*

The Tension Lock allows the system to be opened or closed using a removable crank handle.

SPEED LOCK | *Over-center operation*

The Speed Lock allows the system to be opened or closed with a single motion of a handle or winch bar. The Speed Lock allows for the operation of the front locks without first releasing the rear locks.

NO SPECIAL TOOLS NEEDED

operator can use a winch bar

TENSION LOCK

allows for optimal tarp tension

All lock components travel with the rear bow

Screw drive allows system to be locked for optimal tarp tension

No secondary adjustments required

Operated completely from the ground

SPEED LOCK

saves operational time and money

All lock components travel with the rear bow

Allows unlocking front without first unlocking rear

Single motion release from either inside or outside the rear bow

No special tools needed—operator can use a winch bar

3

LATCH LOCK ALLOWS FOR EASY OPENING AND CLOSING OF THE FRONT BOW TO THE BULKHEAD

A double hinged Latch Lock tightly secures the front bow to the bulkhead while ensuring a watertight seal.

Latch Locks are operated from the ground for increased safety. When using the rear Speed Lock, Latch Locks allow operator to open and close the Conestoga without first releasing the rear locks.

Handles are built-in for ease of operation

Stainless steel cane bolt securely locks handle

Heavy duty components provide security and low maintenance

Engineered using minimal components for reduced maintenance

HEAVY DUTY
CANE BOLT

BUILT-IN
HANDLE

LATCH LOCK

4

UPLIFT BOW AND ASSEMBLIES

UPLIFT BOWS REDUCE TARP SAG

Uplift bows are designed to reduce tarp sag and maximize internal load clearance. Spring shocks on the Conestoga uplift bows absorb vibrations from road conditions and extend system and tarp life.

Maximizes inside loading clearance by reducing tarp sag

SPRING SHOCK

maintenance free – no bushings to repair or replace

DOUBLE UPLIFT

8-10 inches of internal tarp drop

optional quints available

QUAD UPLIFT

4-5 inches of internal tarp drop

5

ROBUST 30" FRONT AND REAR BOWS

The front and rear bows of the Conestoga were designed to be 30" wide, resulting in increased ease of rolling and added stability when compared to systems with narrow bows.

Rear bow has full exterior sheet for additional strength and final tarp installation adjustments

Available without full exterior sheet and adjustable tarp clamp

6

BULKHEAD AVAILABLE IN BOTH DOT AND NON-DOT MODELS

Non-DOT bulkheads are available with or without access doors. Access doors are available as both standard and heavy duty.

NOTE: Any bulkhead with a door is non-DOT rated. Bulkhead access doors are 6 x 3 feet.

**Industry's Only DOT rated bulkhead to meet both the U.S. Department of Transportation width regulation 658.16 (b)(2)(vi) and standard 393.114 (c)(2) for loads up to 50,000 lbs.*

BULKHEADS

Sleek, smooth aerodynamic design to reduce drag and increase fuel efficiency

Built-in front lock assemblies for maximum loading clearance

Available with optional chain racks and trays

Optional polished aluminum front sheets available for all models

STANDARD NON-DOT WITHOUT DOOR

STANDARD NON-DOT WITH DOOR (T-handle locks)

STANDARD DOT (not available with door)*

HEAVY DUTY NON DOT WITH DOOR (stainless steel lock rod)

STANDARD NON-DOT with access door

HEAVY DUTY NON-DOT with access door

HEAVY DUTY NON-DOT with access door

AERORAD AND CURTAINS

7

AERORAD

AeroRad duals as an aerodynamic rear end device that reduces drag and saves valuable fuel.

AeroRad also secures the curtain to the rear bow for a watertight seal.

No buckles, straps, velcro or bungees required

Simple and fast over center cam lock

AERORAD

CAM LOCK

CURTAINS

The Conestoga offers two rear curtain options—a Roll and a Pull curtain. Choose the way you want to operate the rear based on your needs and preferences.

ROLL CURTAIN

Crank handle operation

Stores on top of the system providing full rear opening and clearance

Underbody handle storage included

PULL CURTAIN

Rope and pulley operation

Offers simple, easy operation without requiring a crank handle

Does not provide full height clearance for rear loading

Flatbed Family of Products

AERO FAIRING

Our Aero Fairing was designed to seamlessly integrate with any underbody tool box—including our durable AeroBoxes—providing increased fuel savings for your flatbed trailer.

United States Patent 9815506

AERO BOX

We manufacture storage boxes at nearly any size for any type of truck or trailer. They stand tough through the harshest road environments and still look great. Whatever you need to protect, you'll find an Aero storage box that's more than up to the job.

AERO BULKHEAD

Industry's leading DOT bulkhead available in 10" and 22" wrap models. Aero makes a complete line of good-looking, hard-working bulkheads to fit your needs.

SIDE KITS

Aero's Side Kits are the strongest and lightest you can buy, with every component engineered for the job it's intended to do. If you have a load to haul, Aero has a Side Kit to keep the weather out and your load safe.

ABOUT AERO

Aero Industries, Inc. is a global leader in the manufacturing of trailer tarp systems and accessories. Founded in 1944, the company's heritage is rooted in engineering and innovation. Aero manufactures a complete line of American-made products for dumps, flatbeds, agriculture, refuse and other trailer applications.
